Introduction

Frontend Developer with 2+ years of experience in HTML, CSS, and JavaScript and 1+ year specializing in React.js, focused on building scalable, responsive, and user-friendly web applications. Skilled in API integration, state management, and clean UI design. ICPC Regionalist with strong problem-solving ability, having solved 1500+ problems across competitive programming platforms.

Skills

Programming Languages: C, C++, Java, JavaScript (ES6+), TypeScript

Frontend Development: HTML5, CSS3, Tailwind CSS, Bootstrap, React.js, Next.js Recharts

Backend Development: PHP, REST APIs

Database: MySQL

Tools & Technologies: Git, GitHub, Figma

Experience

Instructor — Novonex EdTech *October 2025 – Present*
Teach software engineering fundamentals, web development, Git/GitHub, code refactoring, and software development best practices while mentoring students.

Projects

CVisionAI https://github.com/Sahrior/CVision-AI
An AI-powered ATS resume analyzer using React, Typescript,Zustand and PDF.js, featuring automated resume scoring, PDF parsing, and interlligent feedback generation. Reduced code redundancy by 30% through reusable React components and a scalable component-based architecture, improving maintainability and development efficiency.
Technologies: ReactJS, TypeScript, Zustand, pdfJS, PuterJS, HTML5, CSS3

Cryptex github.com/Sahrior/Cryptex
Built a modern cryptocurrency dashboard using React and Vite, focused on helping beginner **Bangladeshi** traders understand real-time crypto market trends through interactive data visualization. Added dynamic search, sorting functionality, responsive charts, and live market statistics using CoinGecko API and Recharts.
Technologies: ReactJS, JavaScript, CSS3, Vite, CoinGecko API, Recharts (Chart Library)

Employee Management System github.com/Sahrior/EMS
Developed a web-based Employee Management System using React, implementing component-based architecture and Context API for state management, with localStorage integration for persistent data handling and efficient CRUD operations.
Technologies: ReactJS, JavaScript (ES6+), Context API, HTML5, Tailwind CSS, Local Storage

MediQueue github.com/Sahrior/MediQueue
Built a web-based queue management system with dedicated portals for patients, doctors, and administrators, along with a real-time public display system to optimize hospital waiting management.
Technologies: HTML5, CSS3, JavaScript, PHP, MySQL

Asterra Quest (Desktop Application)
Developed a 2D open-world space shooting game featuring an interactive solar system, mission-based gameplay, and real-time multiplayer battles with chat functionality.

Technologies: JavaFX, Canvas API, CSS, Socket Programming

Problem Solving Profiles

Codeforces: Rating 1235 (Top 15% in Bangladesh), 850+ Problems Solved, Handle: **ZeroPotential**

CodeChef: Rating 1475 (Top 10% in Bangladesh), 200+ Problems Solved, Handle: **Sahrior_Shovon**

LeetCode: Rating 1505 (Top 10–15% in Bangladesh), 100+ Problems Solved, Handle: **sahrior**

HackerRank: 5-Star Problem Solver, Handle: **@sahriorishere**

ICPC Regionalist 2024

Achievements

- 2nd Runner-Up — Advanced Object-Oriented Programming Project Show (among 113 teams)
- 4th Runner-Up — System Analysis and Design Project Show, United International University
- Silver Medalist — BeatCode 243 (Inter-university programming contest)
- Finalist — BUBT Innovates Hackathon (Frontend Developer & UI/UX Designer)
- Ranked 33rd — YCPC Grand Finale 2025 (organized by Phitron)
- Champion — CODECLYPSE (Intra-UIU Programming Contest)

Education

United International University
B.Sc. in Computer Science and Engineering
CGPA: 3.54
